HOW WE'LL WORK WITH YOU

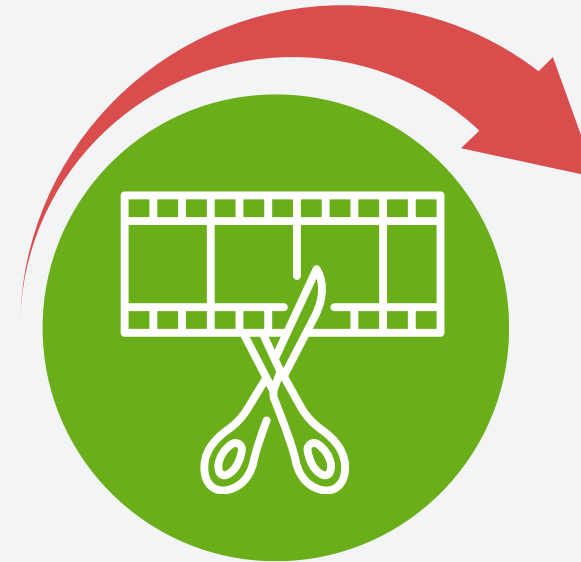

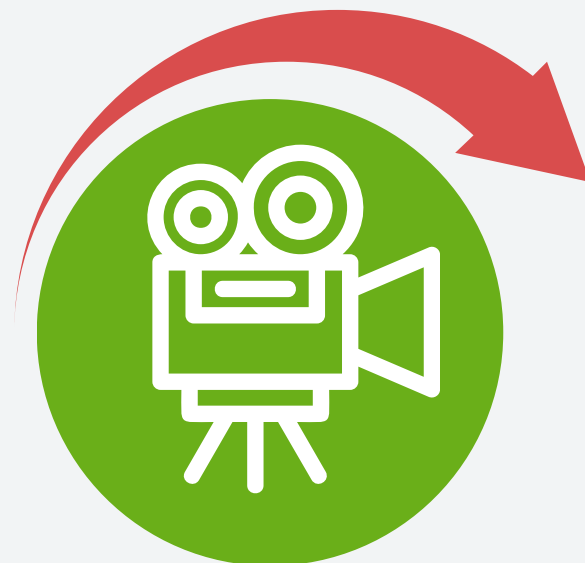

1. Brief Taking

We'll have a call or catch up with you to work out a brief for the work we're going to produce. This is an opportunity to pin down **everything you want.**

2. Filming

We'll film **on location** for your content - this can be anything from promo-style video content, to interviews and much more.

2. The Edit

This stage is **vital to the process.** Our videography team will edit the footage to your requirements. We'll then send to you for **approval** - we can make changes if needed.

4. Approval

Once we have finished the edit process, we'll **send all agreed versions** to you for approval. We can make two rounds of edits as part of the campaign.

5. Your Video

Once the video has been approved, that's it! We'll send you all versions via WeTransfer, and we'll **publish** any agreed content on our website and across our social media platforms.

SEARCH ENGINE OPTIMISATION

Search Engine Optimisation (SEO) is a strategic process aimed at enhancing your online visibility and attracting more organic (non-paid) traffic to your website.
